ADD-ON SAP BUSINESS ONE · XEICORE

XEI.ContoLavoro – Installation, License and Menus

XEI.ContoLavoro · Version 1.2.1

Contents

Requirements
Installation
License
Menus

Requirements

SAP Business One	10.0 or later
Database	Microsoft SQL Server or SAP HANA (on SAP HANA, a test during installation is recommended)
System	Microsoft .NET Framework 4.8 on the SAP client PC
Program languages	Italian, English, German, French, Spanish, Turkish

Installation

1. Download the `XEI.ContoLavoro.zip` package.
2. In SAP Business One open the **Extension Manager**, import the package and assign it to the company.
3. On first start the add-on creates tables, fields, the Subcontracting Job object and the formatted search of the subcontractor vendor on the warehouse. SAP shows the message "*The database structure has been modified...*": answer **Yes** and wait for it to finish before using the client.

Every update of the add-on is installed the same way.

Before creating jobs, define the numbering series of the Subcontracting Job, as for SAP documents: *Modules › Administration › System Initialization › Document Numbering*, item **Commessa terzista** (Subcontracting Job) at the bottom of the list. Without a series, when you open *Subcontracting Job* the add-on tells you to define it.

After installation: fill in the **Configuration**, then in SAP link each subcontractor warehouse to its vendor (*Fornitore terzista* (Subcontractor vendor) field of the warehouse master data) and mark the subcontracting items (user manual, chapters 3 and 6).

License

The add-on works with a **license code** issued by XEI.

- **Trial**: after requesting the trial you receive by email a **trial code**, valid for 30 days from sending in any company.
- **Purchase**: you send XEI the two codes of the **Licenza** (License) window and receive the license code.

The **Licenza** (License) window:

- Without a valid code the add-on is **locked**: its menu contains only *Informazioni* (About) and *Licenza* (License), and at startup the **Licenza** window opens by itself with the status and the reason.
- The window shows the **company code** and the **server code**: to purchase the license, with *Copia* (Copy) you send them to license@xeisrl.com.
- An SAP **superuser** pastes the code received into *Inserisci un codice di licenza* (Enter a license code) and presses *Salva codice* (Save code): the add-on is unlocked immediately, without restarting SAP.

- The trial code is valid in any company. The license code is valid for the company (database) or the server of the codes sent.
- The same window opens at any time from the *Licenza* menu: status, expiry date, number and scope of the license.

Menus

The items are in **XEI-Addon › Subcontracting**. The **Subcontracting** submenu also appears in the SAP module chosen in Configuration (*Purchasing* or *Production*).

Item	Function
Subcontracting Job	opening, search and creation of Subcontracting Jobs (user manual, chapters 4 and 5)
Create Jobs from Production Orders	Subcontracting Jobs from the external processing of production orders (chapter 6)
Receipt from Subcontractor	receipt of the products of a subcontractor's delivery note across several Subcontracting Jobs (receipt of the products and issue of the components)
Mass Component Transfer	shipment of the components for several Subcontracting Jobs; can be disabled in Configuration (chapter 9)
Component Transfer Between Jobs	moves the stock already at the subcontractor from one Subcontracting Job to another (chapter 9)
Mass Closing of Product Goods Receipts	closes the goods receipts of the products that are still open (chapter 9)
Subcontractor Processing Prices	processing prices by subcontractor and product (chapter 9)
Configuration	options of the add-on (chapter 3)
Informazioni (About), Traduzioni (Translations), Licenza (License)	common items of XEI add-ons; Licenza: status and license code
