XEI.CommissionManagement – Installation, License, Menus and Authorizations

XEI.CommissionManagement · Version 1.1.0

Contents

Requirements
Installation
License
Menus
Authorizations
Support

Requirements

SAP Business One	10.0 or later
Database	Microsoft SQL Server or SAP HANA (on SAP HANA, a test during installation is recommended)
System	Microsoft .NET Framework 4.8 on the SAP client PC
Program languages	Italian, English, German, French, Spanish, Turkish
Mail	reachable SMTP mail server, only to send statements to agents by email (Configuration › Email)

Installation

1. Download the `XEI.CommissionManagement.zip` package.
2. In SAP Business One open the **Extension Manager**, import the package and assign it to the company.
3. On first start the add-on creates fields, tables, indexes and authorizations. Creating the fields on the document lines takes **a few minutes**: SAP shows the message *"The database structure has been modified... all open windows will be closed. Continue?"* several times: answer **Yes**.

Every update of the add-on is installed the same way.

After installation: fill in the **Configuration**, then the **Agents** (roles, superiors, percentages), then the **Rules**. Only from then on do documents receive the percentages. Users who are not superusers must be given the **authorizations** (below).

License

The add-on works with a **license code** issued by XEI.

- **Trial**: after requesting the trial you receive by email a **trial code**, valid for 30 days from sending in any company.
- **Purchase**: you send XEI the two codes of the **Licenza** (License) window and receive the license code.

The **Licenza** (License) window:

- Without a valid code the add-on is **locked**: its menu contains only *Informazioni* (About) and *Licenza* (License), and at startup the **Licenza** window opens by itself with the status and the reason.
- The window shows the **company code** and the **server code**: to purchase the license, with *Copia* (Copy) you send them to license@xeisrl.com.
- An SAP **superuser** pastes the code received into *Inserisci un codice di licenza* (Enter a license code) and presses *Salva codice* (Save code): the add-on is unlocked immediately, without restarting SAP.

- The trial code is valid in any company. The license code is valid for the company (database) or the server of the codes sent.
- The same window opens at any time from the *Licenza* menu: status, expiry date, number and scope of the license.

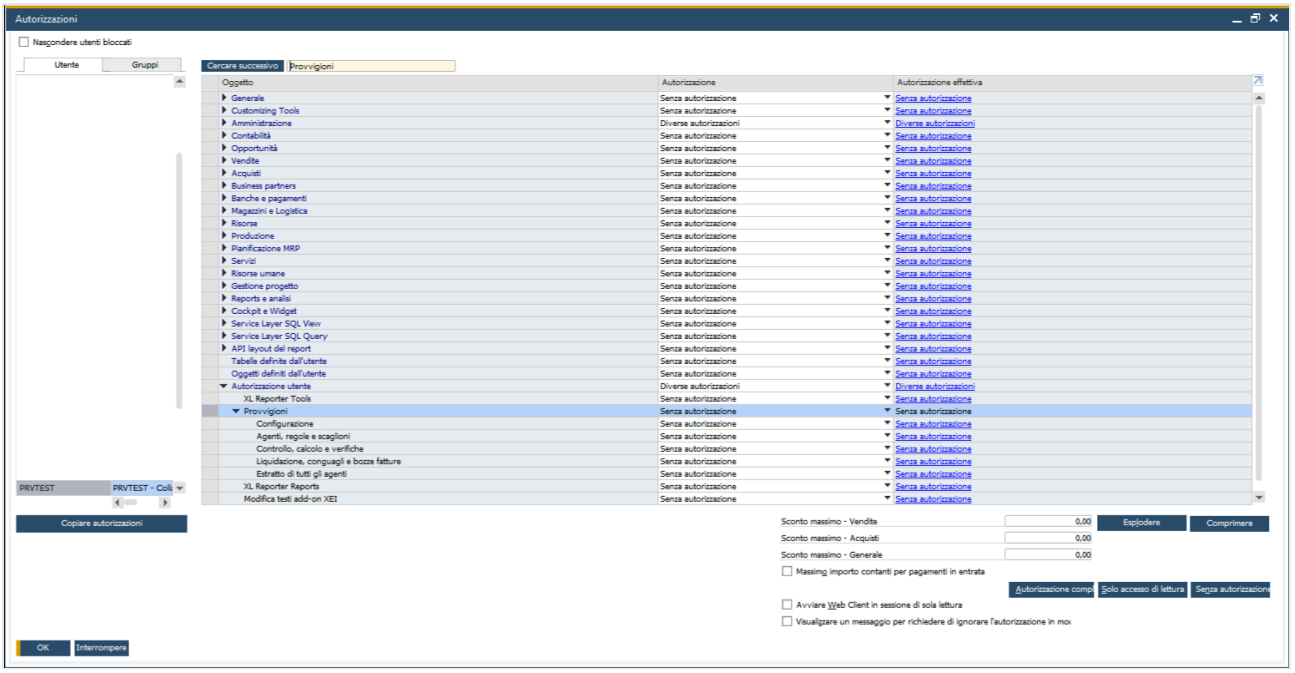

Menus

The items are in **XEI-Addon › Commissions**.

Item	Function
Configuration	options (six tabs) and rule search order (user manual, chapter 5)
Agents	role, superiors, default %, % on invoicing, settlement, vendor, SAP user (chapter 6)
Percentage rules	% by customer, customer group, item, item group, price list (chapter 7)
Tiers and bonuses	bonuses on annual sales, if enabled in Configuration (chapter 15)
Check and assign %	comparison of documents with rules and bulk correction (chapter 9)
Commission calculation	calculation on invoices, down payment invoices and credit memos (chapter 10)
Calculated commissions	consultation, correction, recalculation, deletion (chapter 11)
Settlement	collected shares to settle, unpaid items to reverse (chapter 12)
Adjustments	manual amounts per agent and month, agent invoice drafts (chapter 13)
Commission statement	calculated, to settle, settled and adjustments; CSV, print/PDF, email (chapter 14)
Checks	issues to check (chapter 16)
Informazioni (About), Traduzioni (Translations), Licenza (License)	common items of XEI add-ons; Licenza: status and license code

Authorizations

In the SAP **General Authorizations** (Administration › System Initialization › Authorizations) the add-on creates the **Provvigioni** (Commissions) node under *User Authorization*, with five sub-items. Superusers always have everything; other users are assigned, for each item, *No Authorization*, *Read-Only* or *Full Authorization*.

General Authorizations: the Provvigioni node with its five sub-items, for a user without authorizations.

Authorization	Read-only	Full
«Configurazione» (Configuration)	–	open and save the Configuration
«Agenti, regole e scaglioni» (agents, rules and tiers)	view	save agents, rules and tiers
«Controllo, calcolo e verifiche» (check, calculation and checks)	view Check, Calculation, Calculated commissions, Checks	apply the %, calculate, recalculate, save shares, delete
«Liquidazione, conguagli e bozze fatture» (settlement, adjustments and invoice drafts)	view Settlement and Adjustments	confirm settlements, save adjustments, post bonuses, generate drafts
«Estratto di tutti gli agenti» (statement of all agents)	see the statement of all agents (without it: only one's own)	also sending by email

Without authorization the menu item answers in the status bar *"Function not allowed: requires the"..." authorization (General Authorizations > Provvigioni)"; with read-only access the window opens, but the buttons that make changes answer "Operation not allowed: requires full authorization on "..."".*

Support

For licenses: license@xeisrl.com. For support: info@xeisrl.com. In the request, state the add-on version (*Informazioni* (About) menu) and a description of the problem.
